JULIJA 

Otroška posteljica JULIJA s svojim enostavnim dizajnom in funkcionalnostjo preseneča v vseh pogledih. Bistvena prednost je spanje mamice v neposredni bližini otroka. Ta prednost se izkaže za nepogrešljivo ob prihodu domov iz porodnišnice in prve tedne privajanja na novo okolje.

Distinguished by its simple design and functionality, the JULIJA bed for children will amaze you in all respects. Its main advantage lies in its ability to ensure that the mother can sleep in the immediate vicinity of her child. As such, it is indispensable upon the return of the mother from the maternity ward with her newborn and the first weeks of settling into a new environment of the baby.

Kolekcija pohištva iz lesa gorskega bora ali cemprina je nežnih a klasičnih oblik. Otroško sobico napolni z energijo, ki je nujna in čudovita sestavina življenja. Zaradi visoke vsebnosti smole in eteričnih olj ima cemprin prijeten vonj, ki se ohrani dlje časa. Ta vonj imenujemo tudi »kadilo iz Alp«. Vonj cemprina dokazano vpliva na miren in bolj zdrav spanec.
